

NETWORK ANALYZER

LCA

DISPLAY WITH MORE THAN 30 PARAMETERS

MEASURING OF THE HARMONIC DISTORTION.
(THD V and I)

4 QUADRANTS MEASUREMENT.

TRUE R.M.S.

MAX-MINIMUM VALUES

RS485 / RS232 SERIAL LINE

2 PULSE-CONTACT-ALARM OUTPUTS

ELECTRICAL PARAMETERS	TOTAL	L1	L2	L3	Max min
Line Voltage (V)		X	X	X	X
Phase Voltage (V)		X	X	X	(1)
Line Current (A)		X	X	X	X
Active Power (P)	X	X	X	X	X
Reactive Power (Q)	X	X	X	X	X
Apparent Power (S)	X	X	X	X	X
Power Factor (cos φ)	X	X	X	X	X
Frequency (Hz)	X				X
THD in current (A)		X	X	X	
THD in voltage (V)		X	X	X	
Active Positive Energy (E+)	X				
Active Negative Energy (E-)	X				
Inductive React. Energy (E _L)	X				
Capacitive React. Energy (E _C)	X				

The LCA is an instrument capable of measuring the whole parameters of an electrical line, from the voltage and current signals of it. Additionally, it permits the measuring of the harmonic distortion.

MODELS

LCA-B	Basic
LCA-BA	Isolated, basic
LCA-C	Isolated, RS485, 2 Relays.

PROGRAMMING

The following parameters of the equipment can be programmed by the keyboard or by the serial line (*):

- *Terminal identity code.
- *Primary voltage.
- *Primary current.
- *Relays operating mode

The configuration can be modified having the units linked in the communication network.

PULSE-CONTACT-ALARM OUTPUTS. (Available in LCA-C version)

The following modes can be selected:

- 1) The measured (E_{p+}) active and (E_{q+}) reactive energy can be sent by pulses through two free potential contacts.
- 2) Both contacts outputs can be activated from the computer or PLC.
- 3) Pulse outputs can be used as alarm contacts in maximum or minimum function.

DISPLAY/ KEYBOARD

A specific lighted LCD display has been developed to show more than 30 electrical parameters, by sequential pages selected by the up and down key.

The meter has 5 keys to select the parameters in the display and to program it.

(1) Only by the serial line

▪ **SERIAL PORT. (Available in LCA-C version)**

The equipment has a serial port, with a programmable baud rate between 300 and 19.200 bps, according to the standard RS-485. The standard baud rate is 9600 bps, with 8 data bits, without parity and 1 bit of stop. It permits the transmission of the measuring value to a PC.

The connection is done to 2 wires. The communication protocol is MODBUS RTU. The standard configuration permits to connect up to 32 equipment in one line.

▪ **MAX.-MIN. VALUES**

Provides the max. and min. values of the following parameters: V_{12} , V_{23} , V_{31} , I_1 , I_2 , I_3 , P_1 , P_2 , P_3 , P , Q , S , Power factor and Frequency.

▪ **TECHNICAL FEATURES**

INPUTS

3 Ph. 4 w. unbalanced.

Nominal Voltage (U_n) 100,110,230 or 400V.
 Burden 1 mA per phase.
 Measuring range 0 + 120 % U_n .

Nominal Current (I_n) 1 or 5 A.
 Burden 0,2 VA per phase.
 Measuring range 0 + 120 % I_n .
 Frequency 50 or 60 Hz.

(*) The LCA-C and LCA-BA are supplied with isolation in the current inputs.

DOUBLE AUXILIARY SUPPLY

Alternative current 63,5/110 or 230/400 V.
 Burden 3 VA
 Working range 70 + 120 % U_n

SERIAL LINE. (available in LCA-C version)

Standard RS485
 Connection to 2 wires.
 Standard baud rate 9.600 bps.
 Maximum length of net per line: 1250 m. without repeater
 Max. number of item per line 32

(Optionally serial line by RS232).

OUTPUT CONTACTS. (available in LCAM-C version)

Number of outputs 2
 Type relay N.O. 250V, 3A

ACCURACY

Class 0,5 in general
 1 for E_a , S and $\cos \phi$.
 2 for E_r

CONSTRUCTIVE FEATURES

Display with lighting
 Enclosure Modular by DIN rail
 Size 6 modules, 105 x 90 mm.
 Plug-in type input/output connections
 Max. wire section. 2,5 mm²
 Weight 0,35 kg.
 Protection degree IP54 (in the front)
 IP20 (in the rear)
 Protection class 2 IEC 1010
 Security Category III

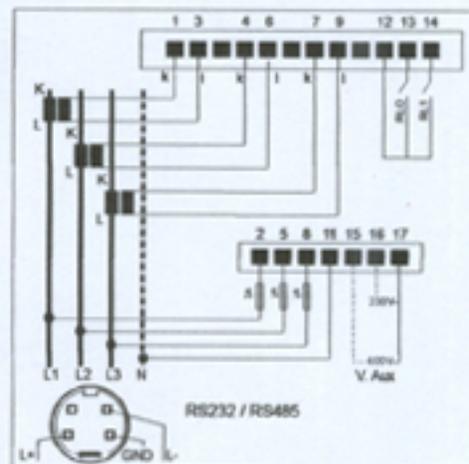

ACCESORIOS

Current transformers x/5 or x/1A.
 Converters RS 232/485. Models IFR1, IFRA y IFR4.
 Repeater RS 485.

OPTIONAL SOFTWARE

Communication Software.
 SACIgest.

NETWORK ANALYZER

LBA

■ SERIAL PORT (available in LBA-C version)

The equipment has a serial port, with a programmable baud rate between 300 and 19.200 bps, according to the standard RS-485. The standard baud rate is 9600 bps, with 8 data bits, no parity and 1 stop bit. It allows the transmission of the measuring value to a PC or PLC. The connection is done on 2 wires half duplex. The communication protocol can be MODBUS RTU. The standard configuration permits to connect up to 30 equipment in one line.

■ PULSE-CONTACT-ALARM OUTPUTS. (available in LBA-C version)

The following modes can be selected:
 (1) Pulse outputs can be used as alarm contacts in maximum or minimum function.
 (2) Contacts outputs can be activated from the computer or PLC.

■ DISPLAY/ KEYBOARD

A specific LED display has been developed to show more electrical parameters, by sequential pages selected by the up and down key. The meter has 5 keys to select the parameters in the display and to program it.

■ TECHNICAL FEATURES

INPUTS	
Nominal Voltage (Un).	100,110,230 or 400V.
Burden	1 mA per phase.
Measuring range	0 + 120 % Un.
Nominal Current (In).	1 or 5 A.
Burden	0,25 VA per phase.
Measuring range	0 + 120 % In.
Frequency	50 + 70 Hz.
Operating temperature	-10 to 60°C
Storage temperature	-40 to 75°C

DOUBLE AUXILIARY SUPPLY

Alternative current	110,230 or 400V.
Burden	3 VA
Working range	70 + 120 % Un

- 4 QUADRANT MEASUREMENT.
- TRUE R.M.S.
- LARGE LED DISPLAY.
- RS485 / RS232 SERIAL LINE

The LBA is an instrument capable of measuring the whole parameters of an electrical line, from the voltage and current signals.

ELECTRICAL PARAMETERS	TOTAL	L1	L2	L3
Line Voltage (Ph-N)		X	X	X
Line Voltage (Ph-Ph)		X	X	X
Line Current (A)	X(*)	X	X	X
Active Power P	X			
Reactive Power Q	X			
Apparent Power S	X			
Power Factor (cos φ)	X			
Frequency	X			
Active Energy (Ea)	X			
React. Energy (Er)	X			

■ PROGRAMMING

The following parameters of the equipment can be programmed by the keyboard or by the serial line :

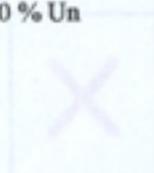

- *Terminal identity code.
- *Primary voltage.
- *Primary current.

The configuration can be modified having the units linked in the communication network.

SERIAL LINE (available in LBA-C version)

Standard	RS485
Connection	2 wires half duplex.
Standard baud rate	9.600 bps.
Maximum length of net per line:	1250 m. without repeater
Máx. number of item per line	30

STANDARDS

Pollution degree	2 IEC 1010
Installation category	III
EN 61036, EN 50081, EN 50082, DIN 43864	

ACCURACY

Class	0,25 for U,I 1 for E, S and cos phi
-------	--

DIELECTRIC STRENGTH

2600 Volt for one minute
100 Amp for one sec, 400 Amp for 0.5 sec

CONSTRUCTIVE FEATURES

Display	LED
Mounting	panel board
Size	110 x 110 mm.
Plug-in type input/output connections	
Max. wire section.	2,5 mm ²
Weight	0,4 kg.
Protection degree	IP52 (in the front) IP50 (in the rear)

ACCESSORIES

Current transformers x/5 or x/1A.
Converters RS 232/485.
Repeater RS 485.

IN SERIAL PORT (available in LBA-C version)
The equipment has a serial port, with a programmable baud rate between 960 and 19.200 bps, according to the standard RS-485. The standard baud rate is 9600 bps, with 8 data bits, no parity and 1 stop bit. It allows the transmission of the measuring values to a PC or PLC. The connection is done via 2 wires half duplex. The communication protocol can be MODBUS RTU. The standard configuration permits to connect up to 30 equipment in one line.

IN PULSE CONTACT ALARM OUTPUTS

(available in LBA-C version)
The following modes can be selected:
(1) Pulse outputs can be used as alarm contacts in maximum or minimum functions.
(2) Contacts output can be activated from the computer or PLC.

IN DISPLAY KEYBOARD

A special LCD display has been developed to show most electrical parameters, by sequential pages selected by the ten alphanumeric keys.
The cursor has 3 keys to select the parameters in the display and to program it.

IN TECHNICAL FEATURES

INPUTS	
Nominal Voltage (lin)	100,110,230 or 400V
burden	1 mA per phase
Measuring range	0 - 120 % Un
Nominal Current (lin)	
burden	0,25 VA per phase
Measuring range	0 - 120 % In
Frequency	50 - 70 Hz
Operating temperature	-10 to 60 °C
Storage temperature	-40 to 75 °C

DOUBLE AUXILIARY SUPPLY

Alternative current	110,230 or 400V
burden	3 VA
Measuring range	0 - 120 % Un
